5 REASONS WHY

Alberta POOL Elevators are worthy of support

- 1 The greater the volume handled by Pool elevators the less the cost of handling per bushel.
- 2 Pool elevators are not operated for profit. They are operated to give the farmers the best possible service.
- 3 Pool elevators assure patrons safety on grades and weights. Close adherence to a strict policy of fair treatment of patrons in respect to grades, weights and dockage is insisted upon by the management, acting under instructions from the delegates.
- 4 The history of grain handling and selling since the time when the prairie was first farmed, up to the present, clearly shows the real importance to producers of maintaining an efficient and complete elevator system under their control. This gives producers a power and influence which they otherwise would not have, were they dependent only on facilities owned and operated on a profit-making basis.
- 5 The success crop in Alberta, with indications of abundant aggregate yield from future years only increases the urgent need of seeing that the support of pool elevators, so enthusiastically given in past years, is maintained during the coming crop year to an even greater extent.

Here and There

"It has on the whole been a very successful year without any serious losses," said Arthur Train, well known livestock dealer in the province, of the farmer than the railways.

I have never yet found any place where the farmer could not get a better price for his grain than the railways.

Encouragement came to western Canada's farmers and agriculturists with the return to normal temperatures and varying rainfall of mid-July. In the drought areas of Manitoba and Saskatchewan and to a less extent in Alberta very great benefit has been felt.

Authentic rainbow trout weighing 7½ lbs. were taken recently in the French River six miles below the bungalow camp, the first ever caught there according to the oldest guide. It was caught by E. A. Farintosh, of New York, a yearly guest at the camp.

Since the split up of Canadian Pacific Railway, common stock, into four for one, this issue has taken on great popularity with the general run of investors. Between September and June 1931, the number of shares increased from 21,156 to 34,872, an increase of 13,636.

Over 250 members from Ramsey, Tenn., Toronto, went to Cleveland recently by Canadian Pacific special to attend the annual convocation and imperial council of the Ancient Arabic Order of Nobles of the Mystic Shrine. This convocation was held last year in Toronto.

A great influx of tourists is coming into the Maritime Provinces this year, the chain of the Canadian L.A. line, hotels at Yarmouth, Digby and Kentville growing strong influence in promoting the traffic. The ten-day all-expense Canadian Pacific tour to the Toronto Exhibition next month is also drawing much attention in the Maritimes.

Grain exports from the port of Vancouver this year will probably exceed 12 million bushels. Up to June 15 wheat shipments amounted to 65,311,000 bushels. Export of grain for the year to date has increased from 12 million in 1929 to 24 million at the present time and exports of grain have increased from 1,740,000 bushels in 1929 to 3,480,000 bushels in 1931.

M. D. of Cereal

The council of the municipal district of Cereal met in Oyen on Saturday, August 8, at 10 o'clock a.m., all councillors being present.

The monthly financial statements were approved, and the roadwork pay-rolls and general accounts were passed for payment.

Council approved of the quarterly payments made to schools by the reeve and secretary.

The secretary was instructed to take up with the Departments of Municipal Affairs and Education the matter of a further line of credit for school purposes.

The secretary was instructed to advertise and sell the goods under seizure at an opportune time.

Council approved of an old age pension for W. Deacon.

The offer of a four rod strip of land along the northern boundary of S.W. 28-25-6, 4, for a roadway, for the sum of \$10.10 per acre was accepted.

Council authorized payment of \$800.00 for road diversion taken out of S.E. 13-25-5, 4.

Council approved of free transportation to the Edmonton district for Thomas Henderson.

The secretary was instructed to point out to the Public Works Department the necessity of immediate relief work for the ratepayers of the district.

Council authorized the borrowing of \$800.00 for Municipal purposes.

Council adjourned to meet again on Saturday, Sept. 12.

M. D. Golden Centre

The seventh meeting of the council of the municipal district of Golden Centre, No. 272, was held at the N.E. 13-30-5, 4, on Saturday, August 1, members all present.

The following five guardians were appointed: Ward 1, M. Klassen; ward 2, W. L. Cole; ward 3, W. Shier; ward 4, W. J. Blair; ward 5, J. C. Dick; ward 6, A. E. Hornett.

The financial statement to July 30, was read and accepted. The general accounts, salaries and a number of relief accounts were passed for payment.

The bill for the collection of arrears of taxes by levying distress under instructions of the local councillor.

Council adjourned to meet at N.E. 13-30-5, 4, on Saturday, Oct. 3.

Relief Expenditures

It is now an assured fact that a very large sum of money will be expended by the Federal, Provincial and Municipal authorities throughout Canada in the provision of relief to people in need of such assistance during the next eight, ten or twelve months. Premier Bennett told Parliament that the situation in the Western Provinces, because of drought and consequent crop failures, constituted a national emergency, while the unemployment situation, aggravated by the loss of purchasing power in the west, was more acute than ever.

As a result of this condition Mr. Bennett informed Parliament that a huge sum of money would be necessary in order to provide the relief required. How large a sum he did not attempt to estimate, but took the unusual step of asking for a "blank cheque" in other words, any amount considered necessary with no limit whatever imposed. Parliament authorized the issue of such a cheque.

Unquestionably there is dire need for large expenditures for relief. They must be provided. No Canadian is prepared to see a fellow citizen suffer for lack of food, clothing, shelter or fuel, not to mention the possibility of dying from starvation or freezing to death. But while there are thousands of such wholly deserving cases, there are many people who can get along without public assistance who will look upon the expenditure of large amounts of public money as just so much "easy" money and will be out to get their share of it.

Right at the outset it would be well if each and every Canadian taxpayer would get the fact firmly established in his mind that this is not "easy" money; that it is in reality the hardest kind of money—borrowed money which will have to pay interest promptly to the end of his days. It is his money and it is in his own interest, therefore, to see that not one dollar is wasted or unnecessarily expended.

It perhaps cannot be too often stressed that there is no magic source of money supply for governments, and further, that governments are but committees of management administering what belongs to the people. Every dollar of this relief money must be borrowed; upon every dollar borrowed interest must be paid; and the interest must be provided by the imposition of taxation upon the people; every dollar of taxation imposed constitutes a drag, a handicap, upon a rapid and complete return to better times, an overhead expense to be carried and paid for throughout the coming years by every business man, every farmer, every workman.

Therefore, every person unnecessarily demanding and unjustly receiving relief he can get along without, is prolonging the period during which the extension of relief to some will be necessary. Such persons may even be in bounds, held down to the actual needs of the situation, rigidly restricted to those who cannot possibly exist without some help.

Communities, as well as individuals, should not be out to get as large a sum of money as they can get, but rather to get as little as possible in the way of relief expenditures. There are hundreds of people who, by a little thought and self-sacrifice could help other people in this time of stress and emergency and thus appreciably reduce the number requiring public assistance. Many people who can afford to do so, and even some who can afford to do so, have in some "adopted" some out-of-work individual or family in need and, in many little ways, are making it possible for them to maintain themselves, with added confidence and self-reliance, thus reducing the demand upon public funds and checking the spread of "the spirit of the dole."

It is to be hoped for the sake of Canada of today and of the future that individuals, communities and municipalities alike will, in the near part, be found boasting of how much they got in the way of relief, but rather will be pointing with pride to the fact that they were able to get along with so much less than others.

Receives Medal

L. J. Burpee Is Honored By French Academy

Word has been received at Ottawa from Paris, that the French Academy has awarded the medaille de Vermeil to Lawrence J. Burpee, a Canadian author, in recognition of his outstanding work in connection with the early history of Canada, and particularly because of his scholarly editing of the *Journals of La Verendrye*, last of the great explorers of New France and discoverer of the prairie provinces of Canada.

The medaille de Vermeil carries with it the title of *Laureat del'Institut*.

Diagraph Aids Firemen

Records of every telephone fire alarm made in Portland, Ore., are being kept on a diagraph attached to the northward, according to *Popular Mechanics Magazine*. When an excited householder screams into the telephone, "Our house is afire," and in his haste mumbles the address or the location of the fire, the diagraph automatically the fireman cannot answer the call, the disk may be "played back" slowly so that the words can be distinguished.

A humpback mushroom found in Australia gives off such a clear green light that it is possible to read by it.

The Mother of Seven Children Used It for Diarrhoea

Mrs. Ed. Drinkwater, R.R. No. 2, Hagerville, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die."

"My husband sent 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few drops and she was soon well again."

"My other children also had diarrhoea at that time, and I gave them Dr. Fowler's with the same results."

Brief Winter Cruises

Cunard Steamship "Mauretania" To Visit Mediterranean Ports

The largest passenger ship chartered ever made by a steamship agency which will send the giant trans-Atlantic Cunard liner "Mauretania" on five important cruises to the Mediterranean next winter, was announced by Ralph Dellevie, president of the National Tours. This enterprise, which surprises the steamship world by the daring and novelty of its programme, will involve financial transactions of a little less than \$2,000,000. The five cruises to the Mediterranean will be in the extraordinarily short time of seventeen days. Previously for cruises of moderate length, the West Indies had been generally considered the only possible objective. Questioned on this point Mr. Dellevie said yesterday:

"The 'Mauretania' is one of only three ships that can make this cruise. Because of her tremendous speed she will be able to cross the Atlantic and divide five full days among the exceptionally fascinating ports of the Mediterranean."

"These cruises are arranged for business men and women, and will consist of seventeen days occupied on any one of the trips is just about equivalent to the usual two-week vacation. The cruises are not wasted. The passengers will get to the sapphire blue waters of the great Mediterranean Sea in a hurry and will have plenty of time to enjoy new climates and scenes before their great ship brings them back again to this side of the water. These cruises will cover three continents and four countries."

Minimum rates for the five Mediterranean cruises to be made by the big Cunarder will be \$245.00 for the round trip. All passengers will be First Class and have the full range of the ship. The regular trans-Atlantic service, including a la carte menu in the dining room without extra charge, will be used in these cruises. A series of shore excursions will also be included in the stated price of the cruise.

Ports which the "Mauretania" will visit on her Mediterranean cruises will be Cadiz in Spain, Gibraltar, Algiers in North Africa and Villefrance on the French Riviera. A day will be spent at each port with the exception of Villefrance where the "Mauretania" will anchor for two days to allow her passengers to visit the most fashionable of the famous French resorts, including Monte Carlo, Nice and Cannes. The cruises will leave New York on December 17th (Christmas and New Year's Cruise), January 8th, January 27th, February 15th, and March 6th.

Appeal For Food

Ask For Surplus Wheat Of United States To Save Millions Of Chinese Food Sufferers

An appeal for surplus wheat of the United States for feeding millions of Chinese food sufferers, who he said, many of them are starving, was made by John Earl Baker, United States ambassador in China.

Baker said the food, which still continued in 16 provinces, was the most terrible disaster in China in 30 years.

At least \$500,000,000 damage had been done, he estimated, but he would not even guess at the number of deaths, which the "Corpses Reclaiming Society" asserted were about 8,000 in the flooded Yangtze valley alone. Hundreds of bodies were being taken from the waters by the society.

It's A Poor Joke

When some one blushes with embarrassment.

"When some one's feelings are hurt."

When something sacred is made to appear commonplace.

When it is directed against some one's intimacy.

When it is uttered in a bitter spirit.

When every one cannot join in the laughter.

Persian Balm is the one true remedy for itching, itching, itching. It cures the mother in the additional level. It cures the mother in the additional level. It cures the mother in the additional level.

When a man should marry a girl one-half his own age, plus seven years."

Not Enough Names

While the Graf Zeppelin was on her Arctic cruise she passed over so many uncharted glaciers, mountain ranges, bays and other geographical features that there were not enough names to go around. Prof. Rodolphe Krechmar, scientific director of the expedition, said recently.

One person out of seven in Great Britain had last winter on money drawn from a magic purse without a bottom, unemployment insurance.

Heavens Reversed In Ceiling Of New York Station

Of the millions who pass annually through the Grand Central terminal, at New York, probably not one-half of one per cent. turn their faces skyward to look at what was once proclaimed the most beautiful ceiling in the world. It had a fine effect with stars, etc. But some cruel person came along and allowed that the whole works was incorrect in that the stars heavens were inverted — in other words, cockeyed.

When the new station opened in 1913, much space was given to the starry ceiling, and now the bubble has burst.

A painter's error had put the stars on backward — that is, their arrangement is a mirror image of the same stars' real position in the Heavens. An interior decorator copied a "celestial globe" from the outside, instead of viewing it from within.

Settlers Go To Peace River

Over Thousand Families Have Taken Up Land Since April

Approximately 4,000 people have settled on British Columbia lands in the Peace River district since April. It was reported to the government by W. S. West, superintendent for the settlement for the province.

These include 1,075 families who are and the area and took up a quarter to half a section of land per family. The majority of these new settlers have made a fine beginning in improving their holdings and getting the land under production, stated Mr. West.

Coloured with the arrival of Mr. West, who has returned from a five-month residence in the Peace River district. Premier Poole announced that the government had virtually decided to grant assistance towards the immediate creation of a modern farm at Fort St. John by an industrial loan.

Recipes For This Week

(By Betty Barclay)

HURRY-UP FILLING

1 glass current or grape jelly.
1 can coconut southern style.
Beat jelly with fork until of consistency to spread. Put between layers of cake and slices of apples. Add Sprinkle thickly with coconut. Make garnish with orange tops and sides of two 9-inch layers.

LEMON COCONUT FILLING

1 cup sugar.
2 eggs, slightly beaten.
Juice and grated rind 1 lemon.
1/4 cup shredded coconut.
Combine ingredients in order given, place in double boiler, and cook until thickened, stirring constantly. Cool and spread between layers of cake. Sprinkle thickly with coconut. Make garnish with orange tops and sides of two 9-inch layers.

MODERN WALDORF SALAD

1 cup celery, finely cut.
2 red apples.
1/2 cup walnut meats, broken.
1/2 cup sweet pickles, sliced crosswise.
1/2 to 3/4 cup mayonnaise.
Core red apples and dice without peeling. Combine apples, celery, walnuts and pickles. Add sufficient mayonnaise to bind ingredients and moisten well. Pipe into salad bowl or heap on small platter, garnished with crisp lettuce.

Rub It In For Lame Back — A Brisk Rubbing With Dr. Thomas' Electric Oil Will relieve lame back.

The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. If you are not convinced, As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Drift Must Files Solo

Though unable to either hear or speak, Edward T. Payne has made a solo flight as a record breaker. He flew about 11 hours of dual instruction at Walker airport, Windsor. It is believed that he is the first person with such handicaps to fly a plane. He will be awarded a private pilot's license as soon as he qualifies.

The Only Way

As we figure it out, it would require millions and millions of people to solve the housing problem, relieve unemployment and discover cures for cancer and tuberculosis. And, of course, it is only for war you could raise a big sum of money like that.

Excavations in Egypt have revealed a large granary containing grain bins and documents of papyrus, some apparently connected with the property and its business deals.

Sells Cattle In England

Saskatchewan Farmer Makes Good Profit On Sale Of 55 Head

William "Bill" Porter, farmer of Wakaw, Sask., arrived recently at Ottawa from England, where he sold 55 head of cattle raised and fattened upon his own farm.

Mr. Porter brought along \$1,300 in hard cash, being the difference between the British price for beef and the price at Winnipeg. By exporting to the Old Country he made just that much more money than he would have done if he had stayed at home and sold through the Winnipeg stock yards.

Hon. Robert Weir, Minister of Agriculture, referring to the Porter shipment, said that these cattle had arrived in England at a price of \$24.25 per head. The market was flooded with Irish cattle. Otherwise Mr. Porter would have made \$2,000 instead of \$1,300 above Winnipeg prices.

The cattle averaged 1,075 lbs., fifteen of the lightest animals brought a top price of 125 cts. per head. The Minister remarked that Porter's was one of the best finished cattle to leave this country. The gain of \$1,300, he said, was calculated after all expenses of the trip to England had been deducted.

"There is no market in the Old Country" said Mr. Weir, "for our really good cattle. If cattle are below the two top grades the British people prefer to buy Argentine beef."

Accepts Ottawa Post

Wheat Pool Statistician Resigns To Take Government Position

Clive B. Davidson, assistant statistician to the Canadian Wheat Pool, has resigned to accept a position with the Agricultural Branch of the Dominion Bureau of Statistics, Ottawa. A graduate of the University of Saskatchewan, Mr. Davidson was first employed by the Saskatchewan Wheat Pool and in 1930 went to Winnipeg as assistant statistician to the central selling agency of the pool.

All mothers can put away anxiety regarding their suffering children when they have Mother Gravel Worm Exterminator to give relief. Its effects are sure and lasting.

Testing New Type Gilder

Fitted with windmill vanes, made familiar by autogiros, a gilder is being tested in Germany, with first results indicating that the idea is successful.

On a vertical post before the pilot's cockpit the vanes, like a large four-bladed propeller, all horizontal, are mounted. The draft wings are slightly smaller than those of the ordinary motorless plane. The vanes are said to enable the gilder to stay aloft in lighter winds than craft of this style.

Leaves On Strange Mission

Italian War Ace Will Stride Heists Of Belgian Congo Gorilla

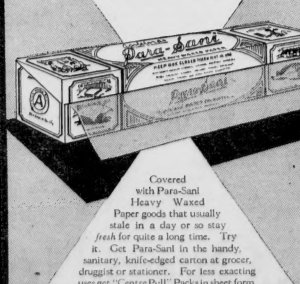

An Italian war ace who went to Africa in 1919 on a Fascist mission for Benito Mussolini and remained to become an explorer, has left New York to study the "hominid" gorilla in a redoubtable effort to end to him by pygmies of the uncharted Congo forests in the Belgian Congo.

He is Commander Attilio Gatti, winner of seven Africa expeditions and survivor of two cobra bites, the dread black water disease and a charging family of gorillas. Specimens from his expeditions fill 23 rooms in the Royal Museum of Florence.

Keep Douglas' Egyptian Liniment always in the stable, ready for immediate use. Removes proud flesh, inflammation, Thrush or Hoof Rot, and infection of cow's feet.

A gasoline pump has been invented which enables the adding machine which checks the amount of gasoline bought and the correct cost.

HUNTER-MARTIN & CO., REGINA, SASK.

Pasture Lands Survey To Be Conducted By Professor Of Saskatchewan University

Complete survey of all pasture lands in Canada is to be conducted by Prof. L. E. Kirk of the University of Saskatchewan, announcement of whose appointment as Dominion Agrostologist was made in the House of Commons by Hon. Robert Weir, Minister of Agriculture.

Reduction in carrying power of ranges has been giving concern to the Government, Mr. Weir said. To order to stimulate the cattle industry a series of experiments are to be conducted as to the best means for the purpose. Prof. Kirk is expected to come to Ottawa within the next few months and will supervise the whole program. The time of his coming to the position was stated to depend upon the finding of a successor to his present post in the university.

"On some stations," Mr. Weir said, "it will take four acres now to carry as many head of cattle as one acre would have done some years ago. The western farmer, due to the price of wheat and other grains during the past few years, have not been attempting to keep a great deal of livestock, even in districts where they might do so, or to pay attention to range crops."

"The farmer is the west has been paying attention particularly to the raising of wheat—and I say this without criticizing them, because they turned their attention to that method of farming which they believed would give them the greatest crop—but the result has been, by taking all the fibre and strength out of the land, to create nearly as possible the ideal condition of the desert."

"One thing we must concentrate on in the west, therefore, is to get the best authorities on soil work on the question of pastureage. There was no doubt that the best man was Professor Kirk of the University of Saskatchewan, at Saskatoon. He is one of the three best men in that work on the American continent, and I think he is easily recognized as the best man in the Dominion of Canada."

The newly appointed Dominion Agrostologist, Dr. L. E. Kirk, was raised on a farm near Hazelton, some 120 miles northwest of Regina. He is professor of field husbandry in the university of Saskatchewan. In his new position he will have charge of the university of grasses suitable for use in Canada.

Dr. Kirk is a graduate of the University of Saskatchewan. He obtained the arts degree in 1915; the agricultural degree in 1916, and later his master's degree. In 1927 he received his doctor's degree in plant breeding from the University of Minnesota. Since his graduation, Dr. Kirk has been engaged as student-assistant and as professor in production of new varieties of clovers and grasses.

Travelling In Russia

Ticket Must Be Purchased Two Weeks Before Journey

With more than 15,000 breakdowns and wrecks reported during 1930 on Russian railways, travel in the Soviet Union is now regarded by the inhabitants as an exciting adventure. To secure a ticket, one must stand in line before the ticket window for 12 to 24 hours, and this must be done at least a fortnight before the contemplated journey. Two men sell tickets at different windows, one for one date and the other for odd dates. Care must be taken by the prospective purchaser that he does not get into the wrong line and thus waste an entire day.—Wall Street Journal.

A cubic foot of water contains 7½ gallons and weighs 62½ pounds.

Hurricanes usually originate in the ocean.

"A friend told me you had a place vacant in your wireless factory."

"Do you know what it is for?"

"Yes, answering the calls of waves."—Moustique, Charleroi.

W. N. U. 1903

Making Work Count

"Record Of Performance" For Poultry, Great Help To Farmers

If the farmer is sufficiently interested in breeding poultry to be doing any breeding on his place, he can make his work count by keeping a record in "Record of Performance" for poultry. This is a system of "production recording" on an official basis of which certificates are issued for those birds which conform to requirements as to number and size of eggs laid, and freedom of disqualifications for the breed.

The department at Ottawa supplies the farmer with leg bands for his birds, with report forms, and with the services of an inspector in selecting the entries, and checking any errors which may crop up in his work. All the farmer has to do is to keep his records, sending an official copy weekly to headquarters at Ottawa.

Every month or six weeks the breeder entered in R.O.P. receives a visit from an official inspector whose duty it is to check up on his records and work. As a regular feature of his special duties these inspectors give the breeder all the information and help possible. From one such visit the farmer gets more vital and useful information about breeding work than the price of entry could procure in other ways.

"Sun Spots" and Furs

Control Yield Of Canadian Fur Product Says Oxford Professor

Has the "sun spot" a predominating influence upon the cycles of plenty and want in the supply of Canadian fur-bearing animals? This question was debated at length at the Canadian Biological Conference held in Mataneque, Quebec, following a paper by Charles Elton, a professor of Oxford, England.

The paper was based largely upon voluminous records kept for over a century by the Hudson's Bay Company. The peak of abundance in furred animals was reached every ten years, he said. Some unknown force exerted its influence on animal populations to keep them in step. He was inclined to a belief in climatic control.

Dr. Huntington, of Yale, said peaks of temperature and barometric pressure generally came out of the Canadian northwest to move power over America. The solar cycle was the foundation of a great many cycles.

Fish Buttons Food Cal

One man, by merely pressing push buttons, catches all the fish in the lake. This is the story of a "fish button" which has been invented by a New York scientist.

The fish button is a small, round, white button which is pushed into the water. When the button is pushed, it releases a small amount of food which attracts the fish.

Mahe—Well, I certainly wouldn't be in your shoes, I'd be in your shoes.

Kelly—It isn't surprising, there wouldn't be room for your feet!

Fighting the Cutworm

Information Received If Land Left In-tact until End Of September

A. H. Vigor, field crops commissioner, states that the recent rains can be made use of to help reduce infestation of fields by pest western cutworms.

The cutworm moths will be busy during August and the early part of September laying eggs. The moths have soft bodies and search for dry, dusty soil in which to deposit the eggs. The recent rains have packed the soil and formed a crust on top it, consequently the moths will pass it over to look for more suitable places.

Land that is intended for cropping next year should not be disturbed by the cutworms, but the crust left intact through August and until about September 10th.

In areas where cutworms were not very serious this year and it is intended to sow fall rye, this may be proceeded with, as by the time the cutworms hatch out in the spring and begin eating the rye has obtained a good growth and damage is not so serious as it is with young tender crops such as spring wheat and grain.

It should be pointed out the rains at this time of year do not affect the cutworms, except by rendering the soil unsuitable for egg laying.

Agriculture In Japan

Amazing Increase In Production Due To Artificial Fertilizers

Japan, a country which is even more densely populated than is China, and whose agricultural territory is limited by four-fifths of the country being mountainous, is reporting a phenomenal increase in its agricultural production. In 1929, Japan was not growing enough rice for her own people and was forced to import large quantities from China and elsewhere. In 1929, owing largely to scientific methods of cultivation and the liberal use of fertilizers, Japan for the first time in recent years, produced a surplus and is still looking for markets abroad for her agricultural produce. The direct cause of this phenomenal increase in production is undoubtedly the policy of the Japanese government.

The consumption of sulphate of ammonia alone in Japan is over 500,000 tons, and of super-phosphate over 300,000 tons, in addition to which large quantities of guano, nitrate of soda, potash and bean cake are used. The annual expenditure in Japan for fertilizers is over 300,000,000 yen.—Weekly Press, Hong Kong.

Praise For New Treaty

Canada's Trade With Australia Will Increase Says Royal Bank

The new treaty between the Dominion of Canada and the Commonwealth of Australia has given a wide variety of Canadian producers a preferred position in the Australian market and constitutes a basis of general optimism concerning the future development of trade between these two countries, states the August letter of the Royal Bank of Canada.

Canadian automobiles, newspaper, timber and canned salmon have been given special consideration, but when Canada exporters have had time to make their goods better known in the Australian market there should be also a substantial increase in the volume of sales of a wide variety of other products. It has been stated that the value of United States exports will suffer by about \$25,000,000, but there are so many opportunities which have been opened to Canadian exporters by this new treaty that a full estimate of effect cannot be estimated closely.

All-Season Attraction

An all-season attraction at Banff in Banff National Park, Alberta, is swimming in the hot sulphur pool, operated by the department of the Interior for visitors to the national park.

There are in all five springs at Banff, the warmest of which is Upper Spring on Sulphur Mountain. The Cave and Basin pool in the most popular, over 50,000 persons passing through the turnstile last season.

Upper Spring has approximately 35,000 patrons.

The difference between intelligence and education is that you can't be a complacent ass if you have intelligence.

"A butterfly," says a naturalist, "is a pest which is really nothing."

Motor Truck Competition

Railway Express Companies Will Re-visit Tariffs In Order To Retain Business

Determined to fight motor truck competition to a finish, railway express companies are undertaking a comprehensive downward revision of tariffs. Several schedules of reduced rates have already been filed with the board of railway commissioners. It was learned at Ottawa, and as a Dominion-wide survey of the situation is continued further decreases are to be made.

The reductions were stated at the railway commission to be due to a change of policy on the part of express companies. At first it was believed the motor truck concern could not continue in business at the low rates they were quoting shippers. As the encroachment on the express company operations continued, however, it became apparent the threat was a very serious one.

Questionnaires have been sent by express companies to manufacturers and jobbers in various parts of the country asking what rates would induce them to restore their patronage to the rail carriers.

As the answers are received, the companies are revising the schedules of charges. The general rule under the Railways Act, it was explained, is that rates may be reduced on three days notice.

In lesser degree, similar action has been taken by railway companies who have suffered from truck competition. Last year several reductions were made. If you take your stand in connection with hauls where the truck is getting a large share of the business.

Character Makes A Man

Colour Of Skin Does Not Affect Worth Of Soul

Dr. Worthington has said that it is character, not colour, that makes a man. This is the one fact which does not change with the change of colour, then all those qualities which are or may be common to men of different colour—bravery, fidelity, honesty, sacrifice, self-sacrifice—become little better than words, that are only words, when they are used to describe the colour of the skin.

Dr. Worthington has said that it is character, not colour, that makes a man. About Town and Country

Residents of this district will be extremely sorry to learn that Dr. and Mrs. S. R. McGregor are leaving Oyen next Sunday to make their home in Drumheller.

Mr. and Mrs. J. Green spent the week-end visiting relatives in Battleford.

Mr. James Lees who has been visiting his family in Vancouver, returned to Oyen yesterday.

Mr. Robert Nisbet, who has been in Calgary for the last five weeks, returned to Oyen this morning.

Mr. David Peck and Mr. Clifford Cates, who motored to Olds last week to attend the wedding of Mr. Hubert Peck, and later went to Edmonton, returned to Oyen Monday evening, when they were accompanied by Mr. Oswald Peck of Beaverlodge.

Mr. William Desmond was a week end visitor in town. Formerly in charge of the Beaver Lumber Company's yard at Glidden, Mr. Desmond has been appointed manager of the Ker-robert yard and left to take up his new duties, Sunday evening.

Mr. and Mrs. M. G. Whitlock and family were week-end visitors in Calgary.

A farewell social to Mrs. A. Campbell, who is shortly leaving for Arlee, Sask., was held at the home of Mr. and Mrs. J. Green last Friday evening.

EXCEL NEWS

Excel & E.A. held their August meeting last Saturday night in Excel school house. After the routine business, co-operative buying was discussed. Mr. T. O. Stephenson, trustee for Excel, reported that twine may be obtained from the Co-operative Buying Association at Pool elevator in Cereal. A ball game preceded the meeting.

The Misses Verma, Peggy and Fay Gainer of Moncton, have been visiting for a week at the homes of Mr. and Mrs. E. Gullekson and Mr. and Mrs. S. B. Gullekson.

Messrs. Melvin, Oscar and Edwin Edstrom of Calgary, spent a few days with their sisters Mrs. C. Gullekson and Mrs. E. Gullekson. The boys were on their way to B.C.

Mr. and Mrs. H. L. Bishop and Lewis, Mrs. F. E. Bishop and Mr. Thos. Littleford motored to Medicine Hat for the week end.

Rev. and Mrs. E. F. Kemp and children attended the Sunday school picnic in Excel last Wednesday.

A number of families from Excel attended Dr. Esler's Diphtheria toxoid clinic in Cereal last Saturday.

Mr. and Mrs. Childers and family, Mr. and Mrs. E. Hicks and family, Mr. and Mrs. Leonard Harris and family and Mr. W. Harris left during the week

noon was spent in races and a ball game, followed by a plentiful picnic supper and two more ball games in the evening. The following were winners of the races: Boys, 5 years and under, Elmer Bakken; Girls, 5 years and under, Margaret Thayer; Boys, 10 years and under, Clifford Gullekson; Girls, 8 years and under, Leona Brannon; 10 years and under, Shirley Gullekson; Boys, 13 years and under, Basil Thayer; Girls, 16 years and under, Bertha Thayer; Boys, 16 years and under, Basil Thayer; Girls, 16 years and under, Ina Anderson; Married women, R. E. Bishop; Married women, Mrs. C. Gullekson, Egg and spoon race, Mrs. C. Gullekson; Men's sack race, Paul Grasse; Boy's sack race, Basil Thayer; Small boy's sack race, Leonard Church; Girls sack race, Elsie Gilbertson; Large girls sack race, Shirley Stephenson; Small girls sack race, Shirley Gullekson.

The committee in charge, Mr. A. E. Weatherall, Mrs. C. Gullekson and Mrs. E. H. Church, are to be congratulated on the success of the day.

with earloads of effects for Eaglesham district where they will take up homesteads.

Mr. and Mrs. McCallum and family also shipped out of Excel this week to the Peace river district.

The Excel Ladies Aid and Sunday school picnic, held at Excel school last Wednesday, was well attended. The after-

World's Grain Exhibition and Conference

Farmers Will Win \$210,750.00 in Prizes

The World's Grain Exhibition and Conference offers Canadian farmers an opportunity to share in cash prizes amounting to \$210,750.00. Competed in 55 competitive classes, open to the whole world, are 1,701 cash prizes. A few of the major awards follow:

\$2,500 a flat prize for 50 pounds of wheat, 30 pounds of oats.
\$1,500 for 40 pounds of barley, 50 pounds of rye.
\$1,000 for 10 ears of corn.
\$300 for 10 pounds of peas; 30 pounds of flax; 30 pounds of clover.

With this splendid opportunity before them, Canadian farmers should keep a watchful eye on their growing crops. They should mark for special care those areas that appear most promising.

It should be understood that all seed and grain samples, if they are not already selected, will have to be found in crops of this year. All exhibits must be received by the Exhibition authorities on or before March 1, 1932.

Of vital importance to the advancement of Canadian agriculture will be the winning of World Championships in 1932 by farmers of Canada. Their seed and grain exhibits must demonstrate to the world the quality of Canada's field crops.

Select the classes from the prize list most suited to the crop you grow, then select your samples from the best you have.

It is best to make your entry NOW. Your sample for exhibit must be in the hands of the Secretary at Regina on or before March 1, 1932.

Valuable information relating to the preparation of grain and seed for exhibit may be secured by writing to the Secretary of the Provincial Committee, World's Grain Exhibition and Conference, care Department of Agriculture, your own province.

Show what you grow and share what you know

On application, the Secretary, World's Grain Exhibition and Conference, Imperial Ball Room, London, will send you printed lists, rules and regulations governing competitive entries and all other information.
